HOW TO USE

1. Engine OFF / key ON.

2. Locate and connect the OBD II Tratauto TECH module in the vehicle. Always check if the green light of the module lights up as connected.

3. Match the module to the mobile / Tablet via Bluetooth, check connection between both.

4. The key of the module is 1234/0000 to pair module - mobile / Tablet.

5. Open the application and enter the required data (license and password) or (Call Tratauto).

6. Carry out a first reading of codes (SCAN) to check connection and obtain vehicle information.

7. We recommend performing a DTC / Failure erasure and start a real value evaluation of the vehicle.

8. Now you can navigate and know the advantages of our application.
